Q. What household servant still works for just pennies a day?

A. Electricity

"Even though prices and wages have steadily gone up and up," explains Reddy Kilowatt, "a kilowatt hour of electricity costs less today than 20 years ago." (Bigger bill? That's because you're using more and living better electrically.) Small wonder electricity is your biggest bargain in modern living.

SECTION ADDED AT DOUGLAS

Acceleration of the DC-7 and DC-8 programs at Douglas Aircraft's Santa Monica division made it desirable to transfer work on the A4D aft-section assemblies from the Culver City location to the company's Torrance facility. Accomplished in progressive steps, with work underway at each location so as not to hinder production of the Skyhawk, the move was completed last week. Approximately 500 employees will be needed by the new department created at Torrance. Assistant Superintendent C. R. Wilkinson, department administrator, says there are now 300 in the department which has been producing assemblies since the first jigs arrived December 9, 1956.

installations. Following operational checks, each assembly will be a complete unit ready to be bolted to the forward section at El Segundo. The tooling department fashioned metal stands around the main assembly jigs, carrying out the Torrance concept of simultaneous work above and below the platform.
